PACS

We are pleased to introduce the *Paediatric Activity Card Sort* (PACS), an invaluable assessment tool for the paediatric occupational therapist! The PACS, which offers a fun, interactive way to develop activity profiles for young clients, creates an enjoyable occupational assessment process for therapists and children alike. Easy-to-use photographic cards allow a therapist to determine a child's level of occupational engagement, and learning to use the PACS is easy, thanks to user-friendly instructions.
